

SD SERIES: DOUBLE GANG PULVERIZERS

The Double Gang pulverizer is the roller and frame used on the LSP6, SS8, SS10 and SS12 Seeders. The 6' model is Cat. 1 3-point with 12" diameter front rollers and 10" diameter rear rollers. The 8', 10' and 12' working width are available in either 3-point or pull-type models. Pick-up models are Cat. 2, drawbar models are hydraulic lift type with hydraulic cylinders and hoses to hitch point included. Safety Light Kits are also standard on the 8', 10' and 12' sizes. The front rollers are 16" diameter and the rear rollers are 12" diameter. Kits are available to convert the 8', 10' and 12' pulverizers to Ag model seeder. Pull-type models include 2 - 9.5L x 15 6 Ply Tires. Approximate Set Up Time: 2 hours.
