

DOUBLE SEEDER HITCH

The unique design of the BDH-512 Double Seeder Hitch allows for pulling any combination of 8', 10' or 12' pull-type seeders in tandem to expand the seeding width up to a maximum of 24 feet. The over-the-top design maintains a transport width only as wide as the widest seeder. The center flex pivot and wide range of adjustments lets each seeder follow the soil's natural contours for consistent seeder operation.

The Double Seeder Hitch incorporates low profile flotation tires on the front frame and a castering wheel and tire on the rear frame to keep wheel tracks in the field to a minimum. All hydraulic plumbing for both front and rear seeders and the hitch is included. The tractor will need to be equipped with three remote circuits to operate the BDH-512. Wiring is included to operate the safety lights on the rear seeder as required.

The rear tongue utilizes an adjustable hitch plate to facilitate easy hookups. The BDH-512 Double Seeder Hitch may also be used with equipment other than Brillion Seeders.

Estimated set-up time: 5 hours (Double Seeder Hitch only)

SPECIFICATIONS (LESS SEEDERS)

Overall Width: 7'11"
 Overall Length: 28' 7"
 Overall Height: 7'5"
 Drawbar Jack Standard Equipment
 Safety Chain Standard Equipment

Tire Size: 27 x 9.50-15 NHS (Front)
 Tire Size: 20.5 x 8 (Rear)
 Hydraulics: 3 Remote Circuits
 ISO Hose Ends
