The blade agitator metering system on the Landscape Seeder allows the accurate metering of a wide variety of seed sizes with seed rates from very light to very heavy rates. The 3" meter spacing on the box ensures uniform seed distribution across the full width of the seeder. Wheel track levelers are standard equipment. For use with Cat. I three point hitch. Skid Steer Landscape Seeder

The Brillion LSS-6 Skid Steer Seeder is a bi-directional seeder with a three point hitch that can be attached to the front or rear of the seeder frame. A skid steer quick-attach mounting plate is standard equipment. Depending on the choice of mounting, the seeder can be either pushed or pulled by the skid steer. In addition, the seeder will also mount to tractors with a standard Cat. 1 three point hitch.

The quick-attach mounting plate allows center mounting and also has a 5" offset feature that allows the seeder to be used on skid steer units with wheel tracks wider than 72".

The LSS-6 features the "blade agitator metering system." This field-proven system is used on other Brillion Landscape Seeders and is noted for accuracy and reliability. Front mounted wheel track levelers are standard equipment. Approximate Prep Time: 1 hour.
