

BRILLION OVERSEEDER

This PTO driven, three point mounted overseeder will seed into existing stands of grass and establish new turf. Precise seed placement and seed to soil contact make this the ideal tool for repairing lawns, parks and athletic fields. The 2-9/32" spacing allows the rear seeder wheels to follow exactly in the notch created by the knives. This creates the greatest level of soil to seed contact which ensures better germination.

Overseeder is not suited for agricultural field or pasture conditions.
