

# TURFMAKER SEEDERS

The standard Turfmaker was designed for seeding grasses and lawn mixtures. It is ideal for sod and turf producers, or anyone who wishes to seed large areas at precise rates. Micro-meter adjustment permits precise metering with an infinite range of settings. All pick-up models are designed for Cat. II hitch. Drawbar models include hydraulic transport with 15" x 5" rims, 2 - 9.5L x 15 6 ply tires, cylinders and hoses to the hitch point. All models include warning light kits. When shipped on factory trucks, seeder comes assembled except for lights, rims and drawbar or 3 pt. Hitch. Approximate Prep/Set Up Time for Factory Assembled Seeders: 2 Hours.

**Warning: Standard Turfmaker Seeders have difficulty metering varieties of fine or hard fescues. For mixtures with fine or hard fescues you must order the Turfmaker II High Capacity Seeders.**

# TURFMAKER JUNIOR SEEDERS

Turfmaker Junior was designed to deliver all of the benefits of the Turfmaker II while still being able to maneuver around tight areas. It is available in four-foot and six-foot wide models with Category I three-point hitch. This seeder is ideal for Landscape and Vineyard seeding or for anyone who needs high volume seeding with maximum maneuverability. Turfmaker Junior's "High Capacity Metering System" allows seeding at rates from approximately 24 to 462 pounds per acre for Tall Fescue and from 24 to 389 pounds per acre for Kentucky Blue Grass. Changing sprockets on the standard speed-up kit can double these rates. Transporting is made easy with the optional Lift Sling Kit. 6' models have windows in large seedbox. Approximate Prep/Set Up Time for Factory Assembled Seeders: 1 hour.
